Chapter 1. Sum Up

How to sum up numbers

Here you will find instructions about using the sum up feature of calculator application.

To successfully add numbers, you must know what is addition.

1. Enter the first number
2. Choose the plus(+) option.
3. Enter the second number.
4. Choose the equals(=) button.

The result from summing up is displayed.

You want to add 2 with 3. The equation will look like $3+2=5$. You enter 3. Press plus button. Enter 2. Press equals button.

The result 5 appears on the screen.

Chapter 2. Subtract

What is subtraction of numbers

Here you will learn what is subtraction.

To successfully perform the task of subtracting numbers, you must understand what is subtraction. the term "subtraction" represents a mathematical operation. Subtraction is a process and action that you perform using numbers. Subtraction allows you to find the difference of 2 numbers.

You use the minus(-) button to express the subtraction operation in the app.

In the subtraction process, you take a number and reduce it to a small number. That is, we take away one number from another.

How to subtract numbers

Here you will find instructions about using the subtraction feature of calculator application.

To successfully subtract numbers, you must know what is subtraction.

1. Enter the first number
2. Choose the minus(-) option.
3. Enter the second number.
4. Choose the equals(=) button.

The result from subtraction is displayed.

You want to subtract 2 from 3. The equation will look like $3-2=1$. You enter 3. Press minus button. Enter 2. Press equals button.

The result 1 appears on the screen.

Chapter 3. Multiply

How to multiply numbers

Here you will find instructions about using the multiplication feature of calculator application.

To successfully multiply numbers, you must know what is multiplication.

1. Enter the first number
2. Choose the star(*) option.
3. Enter the second number.
4. Choose the equals(=) button.

The result from multiplication is displayed.

You want to multiply 2 with 3. The equation will look like $3*2=6$. You enter 3. Press star button. Enter 2. Press equals button.

The result 6 appears on the screen.

Chapter 4. Divide

How to divide numbers

Here you will find instructions about using the division feature of calculator application.

To successfully divide numbers, you must know what is division.

1. Enter the first number
2. Choose the forward slash(/) option.
3. Enter the second number.
4. Choose the equals(=) button.

The result from division is displayed.

You want to divide 6 by 3. The equation will look like $6/3=2$. You enter 6. Press forward slash button. Enter 3. Press equals button.

The result 2 appears on the screen.
